

Electrada Teams Up with Duke Energy

KEY STATS

Company: Duke Energy

Vertical: Utilities

In a Nutshell: Electrada teams up with Duke Energy to build a first-of-its-kind model fleet electrification depot.

The GPS: Mount Holly Technology and Innovation Center in North Carolina.

Snapshot View: Duke Energy, among the largest energy holding companies in the U.S., is teaming up with Electrada to build a first-of-its-kind microgrid-integrated fleet electrification depot, adjacent to Daimler Truck North America's largest east coast manufacturing facility.

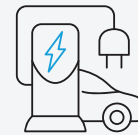

The new center will offer DTNA an ability to utilize the EV charging hub and demonstrate the future of electric fleet mobility.

Harry Sideris, EVP of Customer Experience, Solutions and Services for Duke Energy, said "we are helping speed commercial fleet electrification across the Duke Energy footprint through innovations like this, while we electrify our own fleet."
